"Serving Our Community and Touching the Earth"

## 2024 Wildlife Packet Order Form

The Knox Soil and Water Conservation District conducts a Wildlife Packet program each year that is designed to meet a specific need by landowners to acquire small numbers of trees and shrub stock. This stock is suitable for use in backyards, odd corners, steep banks, or for the development of wildlife land. Transplanting is not necessary and with reasonable care a fine planting can be developed.

All stock is state and federally inspected. It may be necessary for us to make reasonable substitutions based on availability of certain species; however, we guarantee that only first quality plants will be used.

The deadline for ordering your packets is April 1, 2024 or until our supply is exhausted. There is no limit to the number of packets ordered, however, payment must be included with your order and orders will be processed on a first come basis. In April, you will receive notification when the packets will be delivered.

Planting instructions, as well as a guide to plant, will accompany your packet at the time of delivery. Payment can be made through a money order, personal check, or cash and must accompany the order. Please remember that these plants are seedlings and the packet will be about the size of a small bag of groceries. Delivery time should be around the third week of April. If you do not receive notification during the second week of April, please contact the Knox SWCD at (740) 393-6724.

### KNOX SWCD WILDLIFE PACKET ORDER FORM

(DEADLINE - April 1, 2024 or until supply is exhausted)

**It's Tree Packet  
Time! Hurry and  
Place Your Order!!!**

**Deadline**

**April 1, 2024**

### Eastern White Pine Packet

**(10 seedlings 3yr. 4" - 7") \$16/pkt**

These seedlings are large conifers with needles 5 to a cluster and 2 to 5 inches long. This is an excellent shade and ornamental tree. Our best pine for lumber and rapid growth.

### Norway Spruce Packet

**(10 seedlings 3yr. 10" - 15") \$14/pkt**

A medium to rapid growing evergreen of conical form. Cones are pendant shaped and needles usually have four sides, stiff and sharp to the touch. Good drainage is necessary.

### Red Oak Packet (10 seedlings 18" - 24") \$18/pkt

This wide, massive, long-lived shade tree is fast growing reaching 80 to 90 feet at maturity. It's lustrous green leaves change to russet red in the fall. It is commercially valuable timber and provides acorns for wildlife.

### White Flowering Dogwood Packet

**(3 seedlings 18" - 24") \$11/pkt**

This is a small tree growing to approximately 25 feet in height. It is one of the finest ornamental trees in the Eastern United States. Slow growing, long lived and tolerates either sun or shade on a dry or well-drained soil.

### Plantskydd Soluble Powder Deer Repellent

Proven effective in commercial applications, this 100% natural product is now available to the home gardener and landscape professional. Animals avoid treated ornamentals, shrubs, perennials and annuals. The Plantskydd can last up to six months over winter on dormant ornamental shrubs and three months on most other succulent /broadleaf plants. The smell of the blood meal base powder deters the deer and wildlife. For more information visit [www.plantskydd.com](http://www.plantskydd.com)

◆-**Powder (1 lb) \$24:** Treats 270 seedlings 1' high.

◆-**Granular (3.5 lbs.) \$26:** Treats approximately 1800 square feet.

◆-**Liquid (1 qt.) \$18:** Treats 100 seedlings 1' high.

### Chinese Chestnut Tree Packet (10 seedlings) \$20/pkt

A prolific bearer of delicious nuts, similar to the American Chestnut, but is blight resistant. Smaller than the American Chestnut. With plenty of room to grow, it will resemble the shape of an apple tree. The chestnut, like the oaks, holds its leaves during the fall and winter.

### Persimmon Packet (3 seedlings 12 - 24") \$12/pkt

Growth habit: Slender, oval-rounded form; usually has a symmetrical outline. Tree size: 35 to 60 feet tall, 20 to 35 feet wide. Flowers are white to greenish white and are shaped like blueberry flowers. Blooms in late April. Fruit is a yellowish to pale orange berry that is 1" to 1 1/2" across. Fruit is edible, ripens in September or October. It is delicious when ripe, but highly unpleasant before ripening. Leaf is alternate, simple leaves are 2" to 5" long and are 3/4" to 2" wide. Dark green in summer but little to no fall color.

### Hardwood Packet: (6 seedlings/3 varieties 12" - 24") \$20/pkt

**Bitternut Hickory:** Large deciduous tree growing up to 115'

with trunk up to 3' in diameter. Leaves are 6-12 " long, pinnate, with 7-11 leaflets. Flowers are small wind-pollinated catkins, produced in spring. Fruit is a very bitter nut 1" long. Grows on wet bottom lands, it grows on dry sites and also grows well on poor soils low in nutrients. Used for furniture, paneling, dowels, tool handles and ladders. Wood is used for smoking meat. Seeds are eaten by rabbits and both seeds and bark are eaten by other wildlife.

**Tulip Tree:** Oval to round crown. Beautiful yellow, tulip-like

flowers attract honey bees. Bright green foliage turns yellow in fall. Needs full sun and plenty of space. Grows to 70-90' with a spread of 35-50'. Good to use to fill in vacant spots in tree plantings.

**White Oak:** A large (90 feet) majestic native tree with wide spreading branches and leaves of blue-green which turn wine colored in the fall. Tolerates most soils except those very wet. It has a slow to medium growth rate. An extremely valuable timber tree and provides acorns for wildlife.
