### Discussion – GIS Server

Mr. Fred Wachtel, Mr. Mike LaVigne, Ms. Deb Bigelow, Mrs. Robin Schonauer and Ms. Barb Mainwaring attended the meeting to discuss the issue of needing a new GIS Server. Mr. LaVigne stated that the GIS server is at its limit as far as capacity. At this point, we are utilizing the SANS to help with the lack of capacity. He is here to discuss what they would like to do to remedy this. He is wondering if we will wait until the server warranty is up to replace this or do we want to look at a solution sooner. Mr. Shryock asked why we paid \$2,000 for a server warranty instead of purchasing a new server. Mr. LaVigne stated that at the time the warranty came due, there was a lot of uncertainty in available funding. Therefore at that time, they elected to pay the warranty. This server was purchased in 2007 for \$9,095.00. A new server could cost between \$5,000 - \$7,000. Mr. Wachtel stated that it is his intent to continue to operate the way they are at this time. He would also like to expand to utilize the program for water and sewer as well. He asked if there is another place to store the information and just keep the space we have. Mr. LaVigne stated that this is possible, and it would cost approximately \$20,000.00. Mr. Wachtel asked how long this would last the county. Mr. LaVigne stated that if they don't add to much more than they are doing per day now, it could last many years. Mr. LaVigne stated that we need to keep in mind, that all the information they are putting in today, will still be there for many years to come. Mr. Shryock asked at what point will we reach capacity on our SANS if we keep adding to the SANS. Mr. LaVigne stated that it is difficult to give an exact date on that. Mr. Shryock stated that it would seem the best solution to this is to add to the SANS and keep adding SANS. Mr. LaVigne state that yes and no, as they will still need a server or will need to get a virtual server. Mr. Shryock stated that he would rather spend the funding on adding the SANS for storage that everyone can utilize. Mr. Wachtel stated that it is their intent that this will grow and grow because the value that they are able to do is such that it can't stop or it will be a miss-service to the community. Mr. Shryock stated that he suggest that we continue to allow them to utilize our SANS as needed and then possible ask them to contribute to the SANS that need to be purchased in two years. Mr. Fischer asked if there would be any benefit to moving them to a virtual server now. Mr. LaVigne stated that we could do that at any time. He will need to determine if their software company can move their information over to the virtual server. They will need to have discussion with them to determine this. They will need to make sure that they have all their updates in place before moving it over to the virtual side. That would be the direction he would like to move in. The Commissioners thanked everyone for attending.

### EDA GPRA Performance Validation Form

Mr. T.J. Justice attended the meeting to discuss the EDA GPRA Performance Validation Form. He stated that we are required to file a report every three years with the Department of Commerce for the waterline grant that went to Summerfields. He is trying to locate the information from the last report and get information for this report. He will continue to work on this report and he will get the information to the Commissioners before he sends it in.

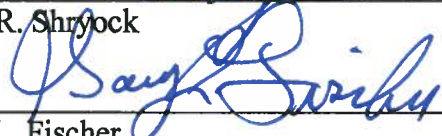

### Adjourn

At 12:57 p.m. Mr. Lee adjourned the meeting.
